Hybrid Water-Cooled Air Conditioners (HWCAC) provide reliable performance, high-efficiency cooling operation with an advanced hot water coil that provides hydronic heat for an entire room without using the unit's compressor.

Console HWCACs independently provide comfort cooling and heating within a room and are often located against walls or beneath windows of a room to accommodate maximum load requirements. These floor console units offer superior performance and are piped to a central water loop.

About Ice Air. Headquartered in Mount Vernon, NY, Ice Air develops and manufactures a wide variety of HVAC units for new construction, replacement and retrofit applications. The company's WSHP products are designed to provide years of efficient, trouble-free performance in multifamily housing, hotels/motels, dormitories, commercial buildings and similar projects.
