WSHP

Located at 320 West 38th Street in New York, Emerald Green is a 25-story, 569-unit LEED certified luxury rental building that incorporates a variety of environmentally responsible touches such as high performance, energy-efficient water-source heat pumps from Ice Air, recycled-content construction materials from regional sources, and green roofs.

**Owner/Developer**

Glenwood Management

**Architect**

Stephen B. Jacobs Group

**Water-source heat pumps (WSHPs)** deliver whisper quiet high-performance heating and cooling with exceptional efficiency. Suited for a wide variety of applications, Ice Air WSHPs meet all UL standards and conform to ASHRAE 90.1, local building codes and energy standards, and are ETL-listed for safety in the U.S. and Canada.

**Console WSHPs** provide independent cooling and heating within rooms. Typically located against walls or beneath windows to accommodate maximum load requirements, console units are piped to a central water loop and offer high efficiency performance (13+ EER) for both new construction and replacement applications.

**About Ice Air.** Headquartered in Mount Vernon, NY, Ice Air develops and manufactures a wide variety of HVAC units for new construction, replacement and retrofit applications. The company's WSHP products are designed to provide years of efficient, trouble-free performance in multifamily housing, hotels/motels, dormitories, commercial buildings and similar projects.
